ABOUT THE COMPANY

Dear Livestocker Distributor Partner, WELCOME!

We are delighted to introduce you to Livestocker Solutions Ltd., a pioneering software development company based in Hungary, renowned for delivering advanced, smart farming ERP software solutions. Our core strength lies in leveraging our extensive knowledge and expertise in animal husbandry to create innovative software solutions designed to meet the evolving needs of today's modern farmers.

At Livestocker, our approach is driven by an unwavering commitment to understanding the specific needs of our clients. We believe in the power of proactive dialogue and active listening in shaping our software functionalities to cater to the future requirements of farmers. Our groundbreaking software solutions are designed to convert raw data into actionable business intelligence and insightful analysis, equipping farm owners with a continuous stream of information, predictive tools, and opportunities for benchmarking performances across the farming industry.

Your Partner in Innovative Farming Solutions

LIVESTOCKER
SMART FARMING & DATA SOLUTIONS

UNVEILING OUR SOFTWARE CAPABILITIES

Our software solutions are designed to empower you with a comprehensive suite of functionalities:

Unified Data Transparency:Our software ensures a consolidated data set, providing complete transparency across all farming operations.

1.

Efficient Mobile App Data Entry: With our intuitive mobile application, we make farm data entry a quick and efficient process.

2.

Insightful Predictability:Our software provides insights into alternative business scenarios, budget planning, and feed requirements, all presented in monetary values for easy understanding.

3.

Modular Structure and Robust Access Management: Our software is designed with a modular structure and robust access management to simplify your operations.

4.

A photograph of an industrial egg processing facility. In the foreground, several large, white, flexible, corrugated tubes are mounted on a stainless steel frame. These tubes are positioned over a conveyor belt that carries a large number of white eggs. The background shows more of the machinery and a stack of egg cartons. The overall scene is clean and industrial.

5.

Comprehensive Control over Medication Use: Our software equips you with full control over medication use, ensuring optimal health and well-being of your livestock.

6.

In-depth Visibility of Profitability, Margins, and Costs: Our software provides a comprehensive view of your profitability, margins, and costs at any given time.

7.

Complete Traceability of Egg Supply Chain and Sows: Our software ensures full traceability of the egg supply chain and sows, reinforcing food safety standards.

8.

Actionable Intelligence and Comprehensive Analysis: Our software offers quick online ad-hoc and comprehensive business intelligence analysis, providing actionable insights.

GLOBAL EXPANSION STRATEGY

Introducing LIVESTOCKER: The Comprehensive Solution for Modern Farms

Having successfully catered to over 20 satisfied clients in our domestic market, we are eager to broaden our horizons and venture into international markets. To facilitate this expansion, we aim to establish an international distributor network in foreign countries. We are seeking partners who possess local business knowledge, language proficiency, and the capability to support our sales efforts. We believe in the potential of revenue-sharing models and invite companies that can assimilate Livestocker Solutions into their portfolio and champion our solutions.
